Hi , i reached level 15 and it said it was locked and i cannot fix this.... i paid for the game and would like to be able to finish. Please help. Otherwise the game is fantastic!!!. Wanted to like this one as keen to support vr educational experiences but you can't move around, you just point at installations and sometimes it starts telling you a mythological story but sometimes it just links up the stars with an overlaying picture and the constellation name. And it doesn't have any feeling of being "there" which I've had with other space educational vr experiences. If it was in a planetarium i'd stop for a couple of mins and move on. More like a pseudo interactive 3D educational video, Going to keep it out of support to the idea but planetary socks need pulling up if this is going to be any good in the longer term.. The battle point is sucks! i want to grind but must wait 1 hour or PAYING CRYSTAL? Clearly P2W, if u have lots of money to spend on junk. then play this.. Game looks like it might be fun if they fix the controller support. Xbox 360 controller here, no excuse for getting THAT controller support wrong...patch it please so I can play and I will reccomend as long as it's a decent game.. DEXED has a lot going for it, awesome art direction and the gameplay is quite fun. You basically have two 'guns', ice and fire and have to target enemies according to the elements. Fire beats ice mobs, ice beats fire mobs. I cannot stress enough how nice the art is in this game, the environments are breathtaking and easy on the mind and not motion sickness inducing.

As with a lot of VR games the game is rather short, but this game has a lot of replayability and the pricing is fair and half that of many other games that are more tech demos over this polished product.

I do recommend this game because it does not entirely focus on the novelty of VR but offers an interesting take on gameplay and what the Vive controllers can do.. Bought it for the VR support, but did not enjoy it on the merit of that alone. Any movement of the lantern causes the whole camera (i.e. your head) to broadly rotate about the Y axis, which is disorienting at best and nauseating at worst. It also suffers badly from "why is this in VR?" syndrome. I also found the stereo effects muddled and strange compared to other games, although maybe I could have resolved those issues if I spent more time tweaking the settings. This might have also been a side effect of an inconsistent frame rate and judder.

Regardless, the gameplay itself was a deal breaker in this instance. I personally didn't find the game fun enough in its vanilla form to play it on screen instead of in headset, although your mileage may vary.. Just loved the game. Wonderful humor and amazing story :)
